OLUSEGUN CALEB

Full-Stack / Backend Web Developer | UI/UX & Interaction Design (Supporting)

Nigeria | 0811 015 0322 | OlusegunCaleb6@gmail.com

caleb-portfolio-eta.vercel.app | github.com/Calebstack | linkedin.com/in/olusegun-caleb-8a7273214

PROFESSIONAL PROFILE

Full-Stack / Backend Web Developer with a B.Sc. in Computer Science, building secure, database-driven web applications in PHP and Laravel, backed by MySQL and MongoDB. Confident implementing RESTful APIs, authentication and authorization, payment integration and relational database design, with a working front-end layer in JavaScript and Bootstrap; deploys on AWS and containerizes with Docker. Early-career profile strengthened by UI/UX and interaction design experience — from wireframes to clickable Figma prototypes — that supports full end-to-end product understanding and closer collaboration with design teams.

CORE COMPETENCIES

Full Stack Web Development • PHP & Laravel Development • Relational & NoSQL Database Design • RESTful API Development • Secure Authentication & Authorization • Payment Integration (Paystack) • Cloud Deployment (AWS) • Containerization (Docker) • Responsive UI Implementation • UI/UX & Interaction Design • Version Control & Code Collaboration

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), HTML5, CSS3
Frameworks & Libraries: Laravel, Node.js, Bootstrap, jQuery, AJAX
Databases: MySQL, MongoDB, PDO (prepared statements), SQL database management
Integrations: Paystack API (online payments), SMTP email (OTP and password-reset flows)
Cloud & DevOps: AWS (EC2, S3, RDS), Docker
Tools & Practices: Git, GitHub (forking, pull requests, code review), REST APIs, Responsive Design, VS Code, XAMPP
Design Tools: Figma, Canva, Webflow, Stitch
Currently Expanding Into: Node.js in production contexts, automated testing frameworks, CI/CD basics

DEVELOPMENT PROJECTS

Campus Find — PHP · MySQL · AJAX · jQuery · Bootstrap
A lost-and-found web application giving students and administrators a secure, searchable way to report and reclaim items on campus.

- Built a full-stack platform for 50+ students and administrators, structuring all database interactions with PHP PDO prepared statements across 6 relational tables to avoid raw SQL queries and reduce injection risk.
- Implemented session-based role authentication and password hashing to support secure multi-role access.
- Built a real-time AJAX/jQuery email-availability check at signup to smooth the registration flow.
- Delivered a fully responsive interface with Bootstrap, supporting CRUD operations and search functionality across screen sizes.

Connect Pro — PHP · MySQL · JavaScript · JSON · AJAX · Bootstrap
A service marketplace connecting clients with service providers, with dedicated dashboards and transparent booking tracking for each role.

- Developed separate PHP-driven client and provider dashboards, keeping each role's interface and permissions cleanly isolated.
- Built keyword and category filtering with PHP and MySQL to speed up service discovery for clients.
- Implemented a booking management system with PDO-backed status tracking, giving users real-time visibility from request through completion.

Fazobeth Ventures — PHP · PDO/MySQL · JavaScript · jQuery · AJAX · Bootstrap · Paystack API · SMTP
A full-stack e-commerce store for mothers and babies, where customers browse products, manage a cart and pay online.

- Built the complete shopping flow — product catalogue, product detail pages, AJAX-driven cart and product loading, checkout, order confirmation and a customer order-history page.
- Integrated the Paystack API for secure online payments, tying each payment to a processed order record in MySQL via PDO prepared statements.
- Implemented customer authentication with signup, login, OTP verification and SMTP email-based password reset.
- Built an admin area with image upload support for managing the product catalogue, and delivered a responsive Bootstrap interface.

SamPrime — PHP · PDO/MySQL · JavaScript · HTML5 · CSS3
A vehicle showcase platform that lets SamPrime advertise its cars online and connect prospective buyers with available vehicles.

- Built a car listings page and individual vehicle detail pages so prospective buyers can browse available stock and view each car's information online.
- Structured the data layer with PDO and MySQL using prepared statements, and organized the codebase into reusable classes and shared page partials.
- Built an admin area for managing vehicle listings, with a clean, responsive front end in HTML5, CSS3 and JavaScript.

PROFESSIONAL EXPERIENCE

Design-facing roles below reflect real product, stakeholder, and workflow experience that supports my transition into software development.

UI Designer (concurrent with full-stack bootcamp) | HOPn — Germany (Remote)
February 2026 – July 2026

- Mapped the applicant journey for a SaaS recruitment platform's HR-AI CV workflow — from upload through AI-assisted screening to shortlisting — into a fully navigable Figma prototype, working directly with data and logic requirements.
- Built responsive screens and interaction states for a finance app's onboarding-to-conversion flow, coordinating with stakeholders on requirements.
- Balanced this design work alongside a concurrent full-stack development bootcamp, meeting both design assignments and programme milestones on schedule.

UI & Graphics Designer (NYSC Primary Assignment) | Powersoft Integrated Solutions Ltd — Ikeja, Lagos, Nigeria
January 2025 – December 2025

- Designed and prototyped a multi-payment approval workflow end-to-end, from static screens through animated, interactive Figma prototypes, ahead of development handoff — direct exposure to the kind of requirements gathering and handoff a development team relies on.
- Delivered consistent, on-schedule output across multiple simultaneous design workstreams while communicating regularly with project managers and stakeholders.
- Prepared on-brand graphic design assets for a company webinar.

Software Development Bootcamp Trainee | Moat Academy
April 2026 – July 2026

- Completed an intensive software engineering curriculum covering HTML, CSS, JavaScript, PHP, MySQL, Bootstrap, and Git, delivering 2 hands-on full-stack projects.
- Applied modern development workflows and industry best practices to meet all sprint deadlines.
- Earned a Software Development Certificate by completing every required project milestone and assessment.

EDUCATION

B.Sc. Computer Science — Redeemer's University (February 2020 – October 2024)

CERTIFICATIONS

- **Software Development Certificate** — Moat Academy (2026): 3-month intensive programme covering PHP, MySQL, JavaScript, HTML, CSS, Bootstrap, Git, and modern web development practices through hands-on projects.
- **National Youth Service Corps (NYSC) Certificate of National Service** (2025): awarded on completion of the mandatory one-year national service programme, including primary assignment as UI & Graphics Designer at Powersoft Integrated Solutions Ltd.
