PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer with a B.Sc. in Computer Science and hands-on experience building secure, database-driven web applications using PHP, Laravel, MySQL, and JavaScript. Skilled in designing clean backend architectures, relational database structures, and responsive, intuitive interfaces. Focused on writing scalable code and continuously expanding into modern full-stack tooling.

TECHNICAL SKILLS

- Languages:** PHP, JavaScript (ES6+), HTML5, CSS3
- Frameworks & Libraries:** Laravel, Node.js, Bootstrap, jQuery, AJAX
- Database:** MySQL, MongoDB, PDO (prepared statements)
- Cloud & DevOps:** AWS (EC2, S3, RDS), Docker
- Tools & Practices:** Git, GitHub (forking, pull requests, code review), REST APIs, Authentication & Authorization, Responsive Design, VS Code, XAMPP
- Currently Expanding Into:** React, testing frameworks, CI/CD basics

EXPERIENCE

- Software Development Bootcamp Trainee — Moat Academy** 2026 · 3 Months
- Built full-stack proficiency, as measured by 2 completed hands-on projects, by completing an intensive software engineering curriculum covering HTML, CSS, JavaScript, PHP, MySQL, Bootstrap, and Git.
 - Delivered functional web projects on schedule, as measured by meeting all sprint deadlines, by applying modern development workflows and industry best practices throughout the programme.
 - Earned Software Development Certificate, as measured by passing all programme assessments, by completing every required project milestone.

PROJECTS

- Campus Find — PHP · MySQL · AJAX · jQuery · Bootstrap**
- Reduced risk of SQL injection to zero across 6 relational tables, as measured by full elimination of raw queries, by structuring all database interactions with PHP PDO prepared statements.
 - Enabled secure multi-role access for 50+ students and administrators (and growing), as measured by zero unauthorized cross-role access incidents, by implementing session-based role authentication and password hashing.
 - Improved signup completion speed, as measured by instant email-availability feedback, by building a real-time AJAX check powered by jQuery.
 - Delivered a fully responsive lost-and-found platform, as measured by consistent usability across screen sizes, by building CRUD operations and search functionality with Bootstrap-based interfaces.
- Connect Pro — PHP · MySQL · JavaScript · JSON · AJAX · Bootstrap**
- Separated client and provider experiences across the platform, as measured by zero interface overlap between roles, by building and deploying a dedicated Provider Dashboard in PHP.
 - Reduced service-discovery time for clients, as measured by keyword and category filtering returning relevant results instantly, by developing search and filtering functionality with PHP and MySQL.
 - Improved booking transparency, as measured by real-time status visibility from request through completion, by building a booking management system with status tracking using PHP and PDO.

EDUCATION

- B.Sc. Computer Science**
Redeemer's University — 2024

CERTIFICATIONS

- Software Development Certificate — Moat Academy (2026)**
- 3-month intensive programme covering PHP, MySQL, JavaScript, HTML, CSS, Bootstrap, Git, and modern web development practices through hands-on projects.
